

## AMENDMENTS TO THE SPECIFICATION

Please change page 6, lines 18-24, as follows:

A  $\lambda_1$ -wavelength selective transmitting filter 17 for selectively transmitting light with the wavelength  $\lambda_1$  is attached to the left half of the light receiving surface of the CCD image sensor 10, and a  $\lambda_2$ -wavelength selective transmitting filter 18 for selectively transmitting light with the wavelength  $\lambda_2$  is attached to the right half of the light receiving surface of the CDD image sensor 10. The set of selective transmitting filters 17 and 18 described in the present embodiment is an example of a wave limitation device as recited in the claims.
